# **Louvashade Max Crank**

Heavy duty vertical blind system

[www.kensingtonsystems.co.uk](http://www.kensingtonsystems.co.uk)

### System features

The Louvashade Max Crank heavy duty vertical blind system has a host of useful features to benefit commercial, education and healthcare establishments.

**Robust head track:** The Louvashade Max Crank vertical blind head track system is very robust, offering users a much longer operating life than traditional dual control systems.

**Mono control:** The use of a single point of control reduces the need for maintenance due to fewer moving parts being present. This also makes the system safer as this feature halves the potential ligature risk of a traditional dual control product.

**Geared down clutch mechanism:** The Louvashade Max Crank vertical blind utilizes a geared clutch on the control side of the blind which offers the user very easy operation. Shading or room or simply increasing privacy and be achieved with minimal operator effort.

### System benefits

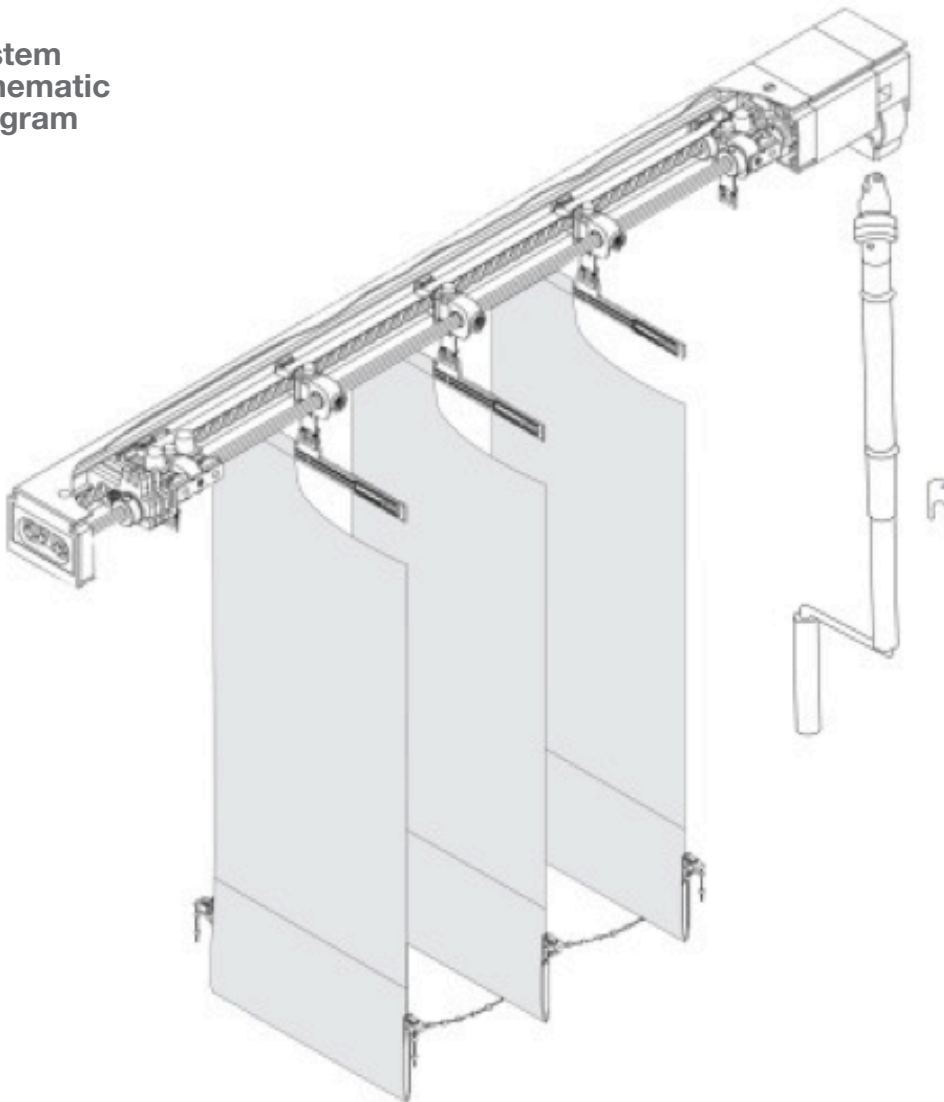

The Louvashade Max Crank heavy duty vertical blind system offers the ease of single crank winder operation for both tilting and traversing the louvres. This standout shading product is designed specifically for use in demanding environments such as school and commercial office environments, in addition it has become the vertical blind of choice with many NHS trusts and police establishments. By winding the crank handle control the louvres effortlessly tilt and then traverse. The robust head-rail and the wheeled louvre carrier trucks are designed to withstand the intensive use typical of commercial, education and healthcare. This system can be supplied with a large range of flame retardant and anti microbial fabrics in 127mm and 89mm louvre widths.

### Technical data

Description	Min. width	Max. width	Max. drop	Max. m <sup>2</sup>
Crank Control	300mm	4550mm	3200mm	14.5

Based on fabric weight of 220g/m<sup>2</sup> otherwise specified. Use of heavier fabrics may require appropriate reductions.
